Search Head	10 Concentric Polo	Beach	*****
Discrimination	No	Audio ID	No
Battery Type	4 x AA	Meter ID	No
Battery Usage Time	40 Hrs	Weight	1.8 Kg

#### Main Description

The CS4PI is a rugged, tough metal detector with dust and shower proof control box, specifically designed for metal detecting on beaches. It operates on the pulse induction principle which is unaffected by the kind of conductive minerals found on the beach such as wet salt. By the very nature of Pulse Induction it is a very simple detector use and so can be operated efficiently by anyone. This is the perfect metal detector for anyone wishing to specialise in beach work.

NB. Although the CS4PI will work on inland sites we do not recommend this as the lack of discrimination makes for a time consuming search. (see CS3MX as a suitable inland alternative at a similar price)

#### CS4PI Features

- On/Off/Sensitivity control
- Variable frequency control
- Belt mountable
- Adjustable stem length

## Product Information - Metal Detector Zone

- Counter balanced stem with armrest
- Headphone socket
