Main Description

Fisher Research Laboratory was founded in 1931 by Dr Gerhard Fisher in his Palo Alto garage. Improving on technology he developed for a direction finder on planes at sea, Dr Fisher and four employees began producing the Metallscope, or M-Scope, the first patented metal detector. Today, Fisher M-Scope is the registered trademark on all Fisher metal detectors and a sure sign that you're buying the best metal detectors available. When it's quality, service, performance and reliability you're after, find it... with a Fisher!

Fisher F2 £214.99 Inc free headphones & Coil cover.

"Fisher's new F2 metal detector is the perfect choice for anyone wanting performance & simplicity!"

Designed to be the top of its class, the F2 is a powerful metal detector in a simple turn on and go format that is perfectly engineered to the needs of today's metal detector user. Features include large easy to read screen with target category, numerical ID and tone ID. The simple one touch adjustments ensure detecting set up is both quick and easy. In the field it is light and nimble so you can detect in comfort all day.

F2 features include:
