Battery Usage Time	30 Hrs	Weight	2.9 Kg

Main Description

Laser metal detectors are the result of a desire to build the perfect metal detector for coping with UK & European conditions. To achieve their goal Laser turned to Tesoro, an American metal detector manufacturer recognised throughout the world for a range of superior quality metal detectors, some of which were already UK best sellers. The combination of clever design by Laser and the build quality of Tesoro ensured Laser metal detectors met their philosophy of simplicity combined with cutting edge technology. Laser metal detectors instantly became one of the best selling and best known brands on the UK market. Today they rightfully maintain that position and continue to produce a range of metal detectors that anyone can use and confidently make good finds time after time.

Laser Hawkeye Metal Detector

The Laser Hawkeye metal detector is based upon the Tesoro's famous Cortes and DeLeon models but has been carefully designed to Laser specifications to cope with and excel in UK and European conditions. The Hawkeye follows the Laser metal detector pedigree in that it is very easy to operate - a true turn on and go yet with performance that comfortably matches that of (much!) higher priced competitors.

The Laser Hawkeye metal detector is light weight and balances perfectly due to the light 9 X 8 web coil and rear mounted

Product Information - Metal Detector Zone

battery compartment. A straight forward LCD identification meter ensures targets are very quickly and easily analysed. Due to the fast recovery speed (the time a metal detector takes to re-set after a signal and be ready for the next signal) it performs particularly well on trashy habitation sites. These features and the fact it is so easy to use have established the Laser Hawkeye metal detector as a firm favourite with pro's and beginners a like.

Features

LCD Identification meter catagorised with UK type targets back light lights meter for low light searches Simple turn on and go metal detecting. "Set up takes under 5 seconds!" Concentric 9x8 waterproof Web coil provides superior depth and very accurate pinpointing. Light weight and perfectly balanced 30hrs battery life (8 x AA alkaline) Designed with performance and simplicity in mind.
