

Laser Rapier Plus

£399.00

Ahead of its time, Ultra light and ease of use are the reason the Rapier has been a best seller for years!

Technology	VLF	Ideal for	Advanced
Transmit	10KHz	Inland	*****
Search Head	9 concentric	Beach	***
Discrimination	Full range	Audio ID	NO
Battery Type	1 x PP3	Meter ID	NO
Battery Usage Time	25 Hrs	Weight	2.8 Kg

Main Description

Laser metal detectors are the result of a desire to build the perfect metal detector for coping with UK & European conditions. To achieve their goal Laser turned to Tesoro, an American metal detector manufacturer recognised throughout the world for a range of superior quality metal detectors, some of which were already UK best sellers. The combination of clever design by Laser and the build quality of Tesoro ensured Laser metal detectors met their philosophy of simplicity combined with cutting edge technology. Laser metal detectors instantly became one of the best selling and best known brands on the UK market. Today they rightfully maintain that position and continue to produce a range of metal detectors that anyone can use and confidently make good finds time after time.

LASER RAPIER 'PLUS' METAL DETECTOR

Built by Tesoro and based around their legendary Silver Sabre series of metal detectors, the Rapier Plus metal detector has been carefully designed to Laser's specifications to meet the demands of UK metal detecting conditions. Ultra light 'micromax' design with simple 'turn on and go' performance sum up the Laser Rapier plus perfectly. Due to customer demand Laser recently added the 9 x 8 web coil as standard for extra depth and a sharper target response.

"Forget the whistles, bells and fancy controls. Laser have put their R&D into a simple to operate performance package. This

Product Information - Metal Detector Zone

metal detector has an uncanny knack of out performing detectors costing twice its price!"

Features:

Lightweight Micromax design. "So light even my Grandma could use it all day!" Pushbutton pinpoint - zero in and dig fast!
Built in mineral rejection - automatically ignores conductive and magnetic minerals Auto battery test - monitors battery life
Silent search Disc mode. - hear only the goodies! Low noise circuitry - no annoying 'pops and clicks' caused by electrical interference or ground minerals. Variable threshold. - compensates for atmospheric conditions for optimum performance.
Simple 'Switch on and go' operation "I was metal detecting in seconds" Three piece stem - compact for storage or travelling
One drop in 9 volt battery - Approx 20 hrs battery life. Economical to use.

£399.00

Supplied with coil cover & free UK delivery*
