### Minelab NEW X-Terra 705

**£595.00**

Deep, fast, versatile & light. The fully featured Minelab X-Terra 705 with V-FLEX technology.

Technology	VLF with VFLEX	Ideal for	
Transmit	7KHz & 18KHz & 3KHz	Inland	*****
Search Head	9 concentric	Beach	****
Discrimination	Full range with notch	Audio ID	yes
Battery Type	4xAA	Meter ID	yes
Battery Usage Time	20hrs Hrs	Weight	1.4 Kg

#### Main Description

The X-TERRA 705 metal detector is the new flagship of the Minelab X-Terra Series and offers the flexibility of three frequency coil options to convert the machine to hunt Relics, Coins and even gold nuggets. Key to its outstanding performance is Minelab's proprietary VFLEX technology, which utilizes digital signal processing with highly calibrated analog circuits, creating a new class of single frequency detectors. This approach yields superior sensitivity, stability and improved immunity to electromagnetic interference. For the X-Terra 705 user, this means you'll have the best machine available for your target choices, taking your passion for discovery to the next level.

The X-Terra 705's unique ability to accept 3 different coil frequencies make it as good as having three detectors in one!

Fit 3KHz coils for superior depth to locate larger, deeper targets. Fit 7KHz coils (9" concentric supplied as std) for the best combination of depth and sensitivity for general purpose searching. Fit 18KHz coils for increased sensitivity to small gold & silver coins and artefacts.

## Product Information - Metal Detector Zone

X-Terra 705 features include:

- VFLEX Single Frequency Sine Wave Transmission Technology
- Three Coil Frequency options: Standard 7.5kHz, Low 3kHz, High 18.75kHz
- Two Detection Modes: Coin/Relic or Prospecting
- Enhanced ground balance adjustment modes: Manual (0-90), Auto, Beach, Tracking, Tracking off-set.
- Target identification: Digital numeric display & tone
- Audio Tone ID's for target: Selectable: 1, 2, 3, 4 or multi-tone
- Adjustable Threshold Tone (-5 to 25)
- Discrimination: 28 Multi-Segment Notching (Accept/Reject); Iron mask (prospecting mode)
- Numeric target ID numbers (-8 to 48)
- 4 Pre-set discrimination patterns + All metal & Iron mask.
- Five Depth indication Icons
- 30-step Manual Sensitivity adjustment
- Five level Noise Cancel adjustment: (-2,-1,0,1,2); Auto
- Pinpoint: Non-motion modulated audio & visual
- 30-step volume adjustment
- Low Battery Audio Alarm
- Positive Reflective LCD Visual Display
- Backlight

## Product Information - Metal Detector Zone

Audio Internal Speaker and Headphone Output

•

Padded armrest: 4 position adjustable with stand & armstrap

•

Length extended 56" (1.42m)

•

Length un-extended 48" (1.22m)

•

Weight: just 1.3kg including batteries (2.9Lbs)

**Only £595.00**

*Including Free Kit! High capacity 2300ma NiMH rechargeable battery kit, headphones, coil cover, control box cover & free Delivery\**

\*UK mainland only. Highlands, Islands and outside UK postage is subsidised and then added to at cost - please call for prices.

( **Already got the kit? Why not call us for our special 'detector only' price.**)
